### **PEGASUS SUPERSAND 300N**

A submersible contractor pump for dirty and sandy water. Suitable for civil engineering: digging out works, tunnel drainage, draining off flooded basements etc.  
A double outer casing water-cooling motor allows the pump to operate to a low water level.  
Stainless steel AISI 304 body, and motor housing. AISI 403 motor shaft.  
Open type multi-channel abrasion resistant impeller in chrome alloy steel.  
Double silicon carbide mechanical seal in oil chamber. 10m H07RNF cable.  
Three-phase 400V / 50Hz with auto reset motor protector.  
Protection class IP 68. Insulation class F. 40° C max liquid temperature.  
Max pump submersion 10 m. pH 6-13
